

DHARMENDRA PANDIT

Jaipur, Rajasthan 302033

☎ +91-6204298947 — ✉ dharmendra193728@gmail.com — [in](#) LinkedIn — [G](#)itHub

Career Objective

Aspiring Software Engineer with skills in Generative AI, Backend Development, Python, and the MERN Stack. Experienced in building scalable web applications, REST APIs, and data-driven systems. Passionate about developing AI-powered applications using LLMs, NLP, and RAG systems while continuously improving problem-solving and full-stack development skills.

Education

JECRC University, Jaipur

Bachelor of Technology in Computer Science Engineering

July 2023 – July 2027

CGPA: 8.17

Technical Skills

Programming & Core

Python, TypeScript

Backend & Data Engineering

Node.js, Express.js, FastAPI, REST API Development, API-based Data Systems, Data Processing & Transformation (JSON, CSV), Basic Data Pipelines, Data Structuring & Workflow Automation

Frontend Development

React.js, Next.js, Tailwind CSS, HTML5, CSS3

Databases

MongoDB, MySQL

AI & Generative AI

Fundamentals of NLP & LLMs, Hugging Face, LLM-based Application Development, AI API Integration, Prompt Engineering

Cloud & Tools

AWS Basics (EC2, S3, DynamoDB), Git & GitHub, Vercel, Render, Postman, VS Code

Projects

CreditWise Loan Approval System (AI Powered) [G](#)itHub — [L](#)ive Demo

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Streamlit, Plotly

- Developed an AI-powered loan approval prediction system using Machine Learning to automate banking decision processes.
- Built an interactive Streamlit web app with real-time prediction and data visualization features.
- Implemented data preprocessing, feature engineering, and Logistic Regression for binary classification.

AI Knowledge Assistant (RAG-Based System) [G](#)itHub

Tech Stack: Python, FastAPI, LangChain, FAISS, Embeddings

- Built a Retrieval-Augmented Generation (RAG) application for semantic document search and intelligent information retrieval.
- Implemented document ingestion, embedding generation, vector search, and query-based response workflows using LangChain and FAISS.

Achievements

- Built and deployed AI-powered full-stack applications integrating Machine Learning and RAG-based systems.
- Hands-on experience with Generative AI tools including LangChain, FAISS, Hugging Face, and LLM API integration.
- Experience with cloud deployment platforms including AWS (EC2, S3, DynamoDB), Vercel, and Render.
